**Subject:** Microsoft Settlement

Dear Judge Kollar-Kotally,

I am objecting to the Proposed Final Judgment. Microsoft continues to break anti-trust laws and discards proper business ethics. The Proposed Final Judgment does not punish Microsoft for its past violations or illegal acts. Every court, which has been involved with the case, has found Microsoft guilty of misdeeds. However, under the proposed final settlement, Microsoft, surprisingly enough, will be permitted to retain most if not all profits gained through their illicit activities. Subsequently, the PFJ will not compensate parties injured or harmed through Microsoft's egregious misdeeds. In addition, the PFJ will not take into account all Microsoft gains made through its illegal maneuverings. With all due respect, the final settlement is basically acknowledging the acceptance of Microsoft's anti-competitive behavior. What kind of message does this send out to the public? I can assure you that the message is clear and simple. The Proposed Final Judgment encourages big corporations to engage in monopolistic and predatory conduct, which in turn is detrimental to the technology industry at large. With all due respect your honor, I am outraged at such a preposterous proposal that only helps Microsoft to remain intact and continue with its unethical practices. To the court, I submit my objection to this Proposed Final Judgment.

All the Best,

James Anthony

Lodi, CA
